Muhammad Fadhila Abiyu Faris

Backend Developer
Jakarta Selatan, Jakarta, Indonesia

Summary

As a full-stack web developer, I focus on Laravel, PHP, Codeigniter, HTML5, and React JS. I've delivered effective solutions across different projects and excel in managing MySQL databases. I enjoy working independently or in teams. Currently, I'm eager to learn more about Golang. My adaptability allows me to contribute effectively to your company's growth.

Experience

VhiWEB
Back End Developer
April 2023 - October 2023 (7 months)
Jakarta Selatan, Jakarta Raya, Indonesia

I contributed to the development of the Drupadi web platform using Laravel October, MySQL, and Docker, including the integration of a booking engine API. Involved in designing and implementing features, my role focused on ensuring system scalability and optimal performance. This experience enhanced my skills in web development, particularly in Laravel and API integration, contributing to the success of the project

PT TRIPUTRA AGRO PERSADA GROUP
PHP Developer
January 2023 - March 2023 (3 months)
Jakarta Selatan, Jakarta Raya, Indonesia

I actively contributed to building web applications with PHP Laravel, using jQuery, Bootstrap, and Node.js. My expertise includes working with MySQL and Oracle databases. I played a key role in adding new features to projects like Gudangku and FAMS, demonstrating my ability to enhance web applications effectively

Indocyber Global Teknologi, PT
PHP Developer

June 2022 - March 2023 (10 months)

Jakarta, Indonesia

Worked as a PHP Developer through Indocyber Global Teknologi, I contributed to projects at PT. Tigaraksa Satria and PT. Triputra Agro Persada. My role involved developing and improving PHP-based solutions to meet the organizations' technological needs and goals. This experience allowed me to apply my PHP development skills in different work environments, making meaningful contributions to project success.

PT Tigaraksa Satria Tbk

PHP Developer

June 2022 - December 2022 (7 months)

Jakarta Selatan, Jakarta Raya, Indonesia

Contributed significantly to the development of web applications using PHP Laravel, leveraging libraries like jQuery and Bootstrap, including customized Laravel solutions by Webarq and API integration for mobile applications. Currently, I am actively engaged in utilizing Flutter for the development of mobile app marketplaces and consumer-centric applications. My experience encompasses a blend of web and mobile development, showcasing adaptability and proficiency across diverse technologies.

Scuti Project

IT Project Manager

January 2022 - May 2022 (5 months)

Karawang, Jawa Barat, Indonesia

Responsible for overseeing the development, creation, and enhancement of project strategies within the IT domain. As an IT Project Manager, I take charge of the entire project lifecycle, ensuring its successful execution from conception to completion. My role involves diagnosing any issues with software and implementing innovative solutions to address identified challenges. This hands-on approach allows me to efficiently navigate through software-related problems, ensuring the seamless progress of IT projects under my purview.

Universitas Buana Perjuangan Karawang

Junior Web Developer

October 2018 - October 2021 (3 years 1 month)

Karawang, Jawa Barat, Indonesia

Engaged in various IT-related projects, I handle a diverse range of tasks as a Junior Web Developer. Collaborating closely with fellow programmers, I

contribute to the development of new features aimed at enhancing application performance. Additionally, I am involved in the design and testing of a new website annually, ensuring a consistent focus on innovation and quality. My responsibilities extend to identifying and resolving various bugs within websites, ensuring the overall quality and functionality of the web properties I work on

Reepal Organizations

Junior Web Developer

March 2016 - March 2017 (1 year 1 month)

Karawang, Jawa Barat, Indonesia

Collaborated with a team of programmers to develop new UI designs and enhance the overall appearance of websites. Additionally, I took on the responsibility of designing websites specifically tailored for the RPL department at SMKN 1 Karawang. This involved a meticulous approach to create user-friendly interfaces and visually appealing designs, contributing to an improved online presence for the designated department
